Commissioner Hamm stated he had spoken with TDEC, EPA and TWRA to get suggestions on what we can do with this. TWRA suggested putting a fence on each side of culvert called a beaver gate.

Mayor Leckner read an old document from 1990 in which Mayor and Commissioners voted for the City to maintain the dam and road but it would be up to the property owners and their association to take responsibility of upkeep of the lake; Otherwise the City would drain the lake. Mayor Leckner stated we don't want to drain the lake but that is where we are going to have to meet in the middle. Commissioner Hamm stated the cost to build the beaver gates will be at a minimum.

Mr. Jim Cromwell, citizen, asked if the City has a disaster plan. Mayor Leckner replied we are currently working on. That is one reason we have requested some of the big commercial size generators from the Government Surplus so we will have those to possibly put at churches, community centers, etc. in case of an emergency.

Commissioner Wood asked if we had anything done at the park to block the roads off afterhours. P.W. replied we don't have anything done at this time. P.W. stated he had intentions of bringing a drawing in tonight but forgot it. Commissioner Wood replied he thought the project was decided on during the special called meeting.
